

Secure Chat in Hyperspace

Communicate quickly and safely in real time with other clinicians by sending secure instant messages within Hyperspace, using Secure Chat. You can send general messages or associate them with a specific patient.

Change your Availability

Let other clinicians know when you're out, in surgery, or otherwise unavailable by changing your status in Secure Chat. The settings you choose apply everywhere you access Secure Chat.

1. In the **Secure Chat** activity, select the appropriate **Status** option from the drop down:
● **Available**, ● **Busy**, ● **Unavailable**.
2. Click **Until** to set how long you'll be in that status.

Or

3. Click .
4. Under **Availability** section, select your **Status**, set how long you'll be in that status in the **Until** section, and enter an away message in the **Message** field. Click **Accept**.
