

At Methodist Mansfield Medical Center, our mission is to improve and save lives through compassionate, quality health care. We're delighted to share with you some of the many ways we fulfilled that mission in 2011.

## Committed to a healthy community

- **Medical support for local athletes.** Methodist Mansfield provided echocardiograms, sports physicals, health education, and team physicians for school athletes and supplied pedometers for every staff member in the Mansfield ISD.
- **Principals' Fitness Challenge.** This program promoted healthy lifestyles in the Mansfield ISD, creating fun ways for the principals, teachers, students, and parents to be more active, eat better, and get healthy.
- **City wellness programs.** Methodist Mansfield hosted educational programs and health screenings for local city employees.
- **Shattered Dreams.** To help promote teen awareness of drunk driving, Methodist Mansfield served as a site for the Shattered Dreams program for community school districts.

We also support numerous community endeavors and organizations, including Mansfield Cares; March of Dimes; American Red Cross; National Night Out Against Crime; local Rotary, Kiwanis, and Lions clubs; Tarrant County Meals on Wheels; Tarrant County Medical Society; and Big League Sports Park, among others.

## Heart care to count on

Methodist Mansfield Medical Center expanded its cardiac care offerings this year:

- **Accredited Cycle III Chest Pain Center with PCI (percutaneous coronary intervention).** This is the Society of Chest Pain Centers' highest level of achievement.
- **Minimally invasive open heart surgery.** With our cardiovascular intensive care unit and advanced operating rooms, we're poised to be the area's go-to source for open heart surgery and interventional cardiology.
- **New heart procedures.** In the hospital's cardiac catheterization lab, we're now performing atrial septal defect repair to correct heart defects, as well as a new catheterization procedure through the wrist, called TR PCI, which reduces the risk for complications.

Methodist Mansfield Auxilian  
Janice Womble was the first patient  
to have minimally invasive open heart  
surgery at Methodist Mansfield.
